***Election/Restrictions***

Upon further consideration, the restriction for the invention is required under 35 U.S.C.

121 as follow:

I. Claims 1, 5-16, and 25-27 are drawn to a finishing unit, classified in class 52, and subclass 273.

II. Claim 17 is drawn to apparatus of a coving kit, classified in class 156.

III. Claim 18 is drawn to a method of finishing an edge, classified in class 52, and subclass 741.13.

IV. Claims 19-24 are drawn to a sealant kit classified in class 52, subclass 749.1

The inventions I, II, and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP 806.04, MPEP 808.01).

In the instant case, the different inventions of claims in group I could be made by using fasteners instead of adhesive.

The inventions I and III are related as process of making and product made. The inventions are distinct if either of the following can be shown:

(1) that the process as claimed can be used to make other and materially different product or

(2) that the product as claimed can be made by another and materially different process.

For instant case, the apparatus claims could be made by a method different than that group II such as making a prefabricating thermoplastic material wall.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper.
